

Your IT department, without the headcount.

Projects that change the business. Managed services that keep it running. A Virtual CIO steering both — so technology stops being something you react to.

How we work with you

PROJECTS

Change the business

Defined engagements with a start and an end. We assess, recommend, then build — website and email setup, AI adoption, migrations, automation.

MANAGED SERVICES

Keep it running

The ongoing IT function, at four levels. Hosting, security, backups, Microsoft 365, user administration, and a real person to call.

VIRTUAL CIO

Decide what is next

The layer above both. Sets direction, budget, and project order — and holds the operation to the plan. Included with Platinum.

Assessment → recommendation → **projects** that change the business → **managed services** that keep it running → revisited by the **vCIO**

Managed services levels

Each level takes on more of your technology surface

Bronze

ESSENTIALS

Everything stays online, current, and backed up — with somewhere to send changes.

Typically IT-light businesses

Silver

ESSENTIALS + USERS

Adds what an internal IT person would own: accounts, access, online presence.

Typically IT-light businesses

Gold

BROAD COVERAGE

Adds automation upkeep, vendor oversight, and priority response.

Typically IT-strategic businesses

Platinum

FULL IT DEPARTMENT

Adds the vCIO engagement — roadmap, budget, and project direction.

Typically IT-strategic businesses

What we set up for you: Professional website · Business email on Microsoft 365 · Domain & hosting · Google Business Profile · Local SEO · Social media setup · Security essentials · Ongoing support · AI & automation · Analytics

✓ Microsoft Gold Partner.
Enterprise-grade tools, right-sized for small business.

✓ 25+ years of experience.
From NASA and major recovery programs to Main Street.

✓ Local & personal.
Florida-based — you always reach a real person.

✓ One team for all of it.
Strategy, projects, security, and automation in one place.

1
Assessment
We learn the business and find where technology holds you back.

2
Recommendation
Which projects to run, in what order, and which level fits.

3
We build & connect it
Set up, secured, and tested — all handled for you.

4
We keep it running
Your level takes over at go-live, and we revisit as you grow.

Not sure which level fits? That's the assessment.

Free consultation and a custom quote — no obligation.
